Serviceable Addressable Market

**26%**  
Market CAGR

**10K**  
Expected Users in 2025

**\$1 M**  
2025 Rev (E)

### Company Overview

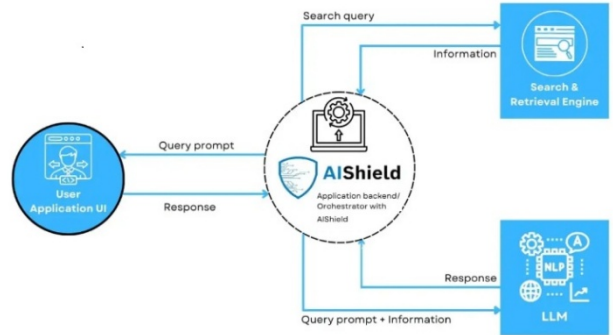

While ChatGPT, Meta Llama, Google Gemini and other GenAI tools are getting popular, privacy and security concerns are increasing. Designed and developed by AI expert, Patrick Kelly, author of book “AI Secure Future: A Vision for Safe AI”.

This AI Shields safely & securely harnesses the power of GenAI and protects GenAI users & GenAI Large Language Models (LLMs) from critical security risks.

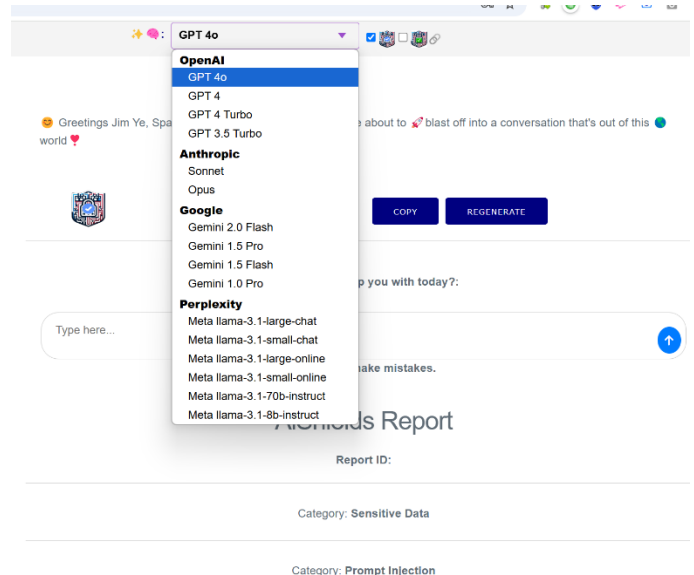

### Additional Highlights:

- ✓ Automatically shield privacy from your Chat AI input. (to prevent AI Chat to collect/store your privacy information);
- ✓ Automatically shield potential harmful links (with Virus, Ransome, Malware) from AI Chat output;
- ✓ More economic solution, only 1/8 cost compared to subscribe all four AI Chats, to ensure the work even if one GenAI service is down;
- ✓ Automatically show the data source (ChatGPT will not show)

### Flow Chart

### User Interface

### Transaction Opportunity

The Company has engaged Imberium to secure \$0.5-1 million in seed funding to expand sales and marketing teams, further develop the existing platform, and expand the operations team.
